### Celebrating Flight: From Kitty Hawk to the Universe

35th Annual NCSTA Conference  
Koury Convention Center  
Greensboro, NC  
November 13-14, 2003

In recognition of the centennial of Flight and the ties to North Carolina this year's conference will focus on flight and where it has taken us in the last century. Many topics from air pressure, the basis of flight physics, and polymers, a component of many technologies developed by NASA, can be linked to air travel but they also have other very important factors in common. All of these topics can excite and motivate students to study science!

Presenters at this year's conference are encouraged to design presentations that fit into one of the four strands:

- Science Literacy
- Inquiry
- Safety
- Technology

*Are you a teacher doing exciting things in your classroom?*

*Do you have any 'tricks of the trade' you would like to share with other educators?*

*Have you every considered presenting a session at the NCSTA conference?*

Now is the time to submit your proposal!  
The deadline for proposals is June 15, 2003

Conference registration forms will be available in August.

### Conference Forms

*Program Presenter Application Form:* for members who wish to present sessions or workshops

- [Online \(HTML\)](#)
- [Printer-friendly \(PDF\)](#)

*Exhibitor Presenter Application Form*: for commercial exhibitors who wish to present sessions or workshops

- [Online \(HTML\)](#)
