

Earth Month

Place this page at the Sun in the center of the orbits. Have one student hold one end of the string at the center and have another line up the string with one of the lines. Place a piece of tape or a sticker on the ground about 4 feet from the center. Move the string to the next line and repeat until you have 12 marks in a circle, one for each Earth month.

Mars Month

Place this page at the Sun in the center of the orbits. Have one student hold one end of the string at the center and have another line up the string with one of the lines. Place a piece of tape or a sticker on the ground about 6 feet from the center. Move the string to the next line and repeat until you have 22 marks in a circle, one for each Mars month.
